

To FCC, I travel accross the southwest and northwest part of the Country and I rely very much on my XM radio and there services like the weather and traffic information for the areas I travel in, I pay a fee for these services and don't want some association or lobbyist dicating how they can now change what we have wanted and needed for some time. I dont want any National Association of Broadcasters sinking there grimmy claws into some new oportunity they feel will benifit there own cause. "Vote NO" on NAB's petition 04-160
